10h00 ICerS

Introduction

10h10 Andrea Briigliadori

Nano-bio systems for water remediation

10h30 Leonardo Duranti

Multi-functional fuel electrode for Reversible Solid Oxide Cells (RSOCs)

10h50 Lara Faccani

Ceramised textile: a powerful tool against organic and biological pollutants

11h10 Nicola Gilli

Microstructure and local properties of (Zr,TM)B₂ solid solutions

11h30 Kai Huang

Embedded Direct Ink Writing of Freeform Ceramic Components

11h50 Apoorv Kulkarni

Integrating polymer derived ceramics with fused filament fabrication 3-D printing.

12h10 Stefano Mungiguerra

Atmosphere re-entry testing of UHTCMCs

12h30 Marco Vacchi

Vanado-tellurite glass-ceramics containing copper oxide: effect of melting environment on structural-electrical properties

12h50 Andrea Zambotti

Nanostructured ceramic aerogels for environmental and energy applications

13h10 Evaluation by Commission

La Commissione comunicherà il nominativo del vincitore della selezione al termine dei lavori.
The Commission will communicate the name of the Contest winner at the end of the works
